Important information 5

1. Red light flashes quickly,and “di di..”sound in the headset.
→The bluetooth headset is low power,please charge it as quick as possible.
2. The headset can not be start-up after charge for 20 minutes.
→The bluetooth headset need to be charged for 40 minutes at least for start-up,suggest to charge enough power consumingly before using.
3.No indication during charge
If the battery was used out of power completely or didn’t use for long time,when you use at the first time,may be no indication light,but need to wait for a few minutes,then blue light will be flash for charge indication, after full charged,the blue light is brighten.
4. No sound on the headset:
—Make sure the headset had been paired successfully with the mobile.
—Make sure the headset had been started up.
—Make sure the distance between the headset and mobile don’t exceed 10 meters.
—Make sure your mobile is in the strong enough signal range.
—Some of mobiles only support one of bluetooth headsets,if more than one bluetooth headset pairing with the mobile,the connection may be interrupted.
5. After charging has been finished, why does my headset can’t work with my mobile?
— Your mobile’s Bluetooth has to be activated first and paired with your headset.
6. Does my bluetooth headset can work with any mobile?
—No, it doesn’t.It can only work with mobile which has bluetooth fuchtion or hands-free function,but there are a few mobile phones support call function, can not support music playing function.
7. What is the effective distance for headset and Bluetooth mobile ?
—About 10 meters.
8. When my mobile is searching the headphone,why do several bluetooth equipment appear?
—Within the effective distance,most Bluetooth mobiles will search several Bluetooth equipments(like PDA,Notebook …) after their Bluetooth has been activated. When your mobile found them,“Aduro SBN15” (or Unknown Equipment) will appear on your mobile.
9. Why does my mobile can’t find Bluetooth equipment?
—If your headset isn’t under the pairing status, your mobile can not find any Bluetooth equipment. Before using your mobile to search any equipment, make sure the headset is under the pairing status.(Refer to user manual for detailed instructions)
10. Should I need every time paired the headset when using it?
—No. The headset and the mobile only required one time pairing when first time using it.
11. Why do noises arise?
Bluetooth equipments’ performance is affected by any one of the following factors:
—Whether mobile is within a strong-signal area or not. If the mobile is within a weak-signal area, its effect will be worse.
—If the distance between mobile phone and headset has exceed the effective distance, it will increase noise.
—The communication effect of QQ & SKYPE depend on the network.
12. What should I do if my headset can not receive well ?
—Adjust the volume button or press “Volume+” on your mobile to increase the volume and test if mobile is within a strong-signal area.
13. Why does my headset can’t work suddenly?
—No power. When battery is low, red indicator will flash, “di,di … “can be heard on the headset.
14. Why does my mobile can’t show the incoming call No.?
—It maybe the people hide the incoming phone No. or your mobile don’t support show caller ID.
15. Why does different mobile have different answering way?
—Different mobile maker use different bluetooth software.For example,for T610,only need to press S4 gently to answer the call,however,for P800 and P900,you should press S4 for 3 seconds then can answer the phone.That cause by P800 and P900 are intelligent mobile,so a little different definition for using keys. Commonly,the way of answer phones are “press the key gently” or “press the key for 3 seconds”.

Attentions: 6

1. If headset can’t be opened, that might lack of power, please charge power at first.
2. Please turn off the headset and put it into box to avoid damage, scratches or bracket deformation when long time no using.In order to prolong the battery service life,please charge every 6 months.
